Importing Data and Load packages

```
library(dplyr)
MData<-FaData<-read.csv("InputData/measurements.csv")
```

Regex and data wrangling

```
MData <- MData %>%
  mutate(Sp = sub("(\\w)\\w+", "\\1.", Organism)) #Replace species name in organism with initial and .
SpData <- MData %>%
  select(-Organism) %>% #remove Organism column
  relocate(Sp) #relocate Sp to beginning
```

Outputting dataset

```
write.csv(SpData, "../Output/MeasShort.csv")
```
